

A controlled process, not spreadsheets.

YOUR REALITY TODAY

CDR compliance running on spreadsheets, inboxes and a few key people means single points of failure — and no way to show the process was actually followed when it matters.

WHAT CHANGES WITH LENDER-WISE

✓ Approvals that happen by default

Defined review and approval steps with separation of duties enforced by the platform — not by memory.

✓ Alerts that reach people

In-app, email, SMS and push — deadlines never depend on someone checking a screen.

✓ A process you can evidence

Every decision and publication recorded within Lender-Wise, with a full audit trail over products and obligations.

● One controlled process

EVERY CHANGE PASSES EVERY GATE

ALERTS REACH PEOPLE — NOT INBOX FOLDERS

Separation of duties enforced - every decision audited

Every change passes every gate — and everyone who needs to know, knows

SECURITY & TRUST BY DESIGN

- Australian-hosted — data stays onshore
- MFA on every account
- Encrypted end to end
- Append-only audit trail

Run CDR compliance as a controlled process within Lender-Wise — repeatable, visible, and never resting on one person's inbox.
