

Two taps. Anywhere. Audited.

YOUR REALITY TODAY

Product changes stall waiting for sign-off — approvals bottleneck on office hours, buried emails and whoever is at their desk. Meanwhile the register drifts out of date.

WHAT CHANGES WITH LENDER-WISE

✓ The request finds you

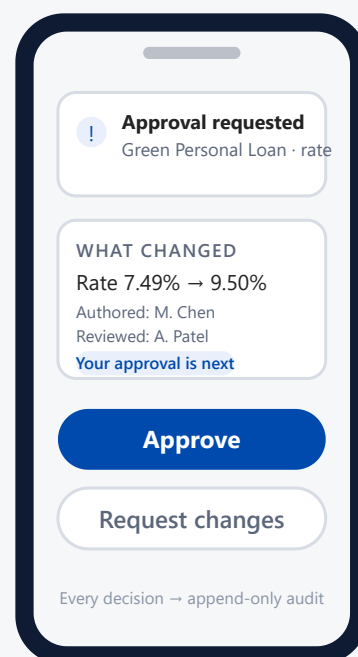

Approval requests arrive by email, SMS and push notification — wherever you are.

✓ Review in context, decide in two taps

See exactly what changed, who authored and reviewed it — approve from your phone, iPad or laptop.

✓ Your decision is the record

Separation of duties enforced; every approval lands on the append-only audit trail, timestamped.

Install from your browser — lender-wise.com/learn/get-the-app

SECURITY & TRUST BY DESIGN

- Australian-hosted — data stays onshore
- MFA on every account
- Encrypted end to end
- Append-only audit trail

Sign-off stops being the bottleneck — and starts being the control.
