Lender-Wise
CDR COMPLIANCE · DATA HOLDERS

FOR THE HEAD OF PRODUCTS

What's public matches what you approved.

YOUR REALITY TODAY

Your rates, fees and features are exactly what the CDR makes public. A mismatch between what's published and what executives approved is a compliance incident waiting to be found — by a comparison site, or the regulator.

WHAT CHANGES WITH LENDER-WISE

- **Author once, against the official schema**
  Product rates, fees and features captured in one register — conformant by construction, not corrected after the fact.
- **Approvals before publication**
  Supervisor review, then executive approval, with separation of duties — no one publishes their own work.
- **Published data matches the approval**
  Live v6/v7 endpoints are generated from what executives approved in the app — there is no separate copy to drift.

Product Register CDR · v7 endpoints

Authoring → Review → Approval → Published

PRODUCT	RATE	STATUS
Fixed Home Loan — 3 yr	7.90% p.a.	Published
Variable — Owner Occupier	6.14% p.a.	Published
Variable — Low Docs	8.50% p.a.	Draft
Green Personal Loan	9.50% p.a.	In review

Your governed Product Register — approved in the app, published live

SECURITY & TRUST BY DESIGN

- Australian-hosted — data stays onshore
- MFA on every account
- Encrypted end to end
- Append-only audit trail

One register, one approval chain, one public truth — what the market sees is always what your executives signed off.
